

Woodland Gardens

A woodland garden is the perfect landscaping solution if your yard has an area that is dominated by large trees. Or perhaps your neighbor owns the trees, casting long shadows near your property border. Either way, woodland gardens are wonderfully meditative and relaxing; the waxing and waning sunlight touches each leaf creating ever changing patterns of dappled light and ephemeral beauty. Hostas, Astilbes, Violets, Rodgersias and Foxglove add color and texture, as well as providing shelter for the woodland creatures that inhabit these often magical, cool retreats.
