

Potential Skin Irritant or Toxicity

The plants below have caused reactions in people, ranging from mild skin irritation to even death in isolated cases. This list is strictly cautionary. We suggest you research the specific plants listed to know more about them and any potential for harm. The absence of a plant on this list does not imply or suggest that the plants that aren't on this list are safe to consume. Eat ornamentals at your own risk!

** Potential Skin Irritant
 *** Inhalation of flowers
